
Firmware 3.15 Lg Download (TOPI Free)

26 Jun 2021 - I guess you can download the update from LG website instead of waiting for the OTA update ... The firmware update does not depend on the region. You do not need an internet connection to update from the official LG website. You can download the LG update file from the LG website. To update your phone, just click "Update" and then select the firmware update file. After that, plug your phone into the charger and start it up. You may need to reboot your phone if necessary. Once the download is complete, you'll be able to choose what to do next. If you want to cancel the update process
