Simple, lightweight and portable software tool that monitors all text copied, thus facilitating a Clipboard history and manager. Capture and manage text clips The Clipboard monitoring tool is automatically enabled at startup and adds new text clips to the list as soon as they're copied. It's possible to auto-scroll this list, split clips into different categories, as well as edit them using any external word processor you have installed. Furthermore, you can get rid of unnecessary or unwanted characters, merge multiple clips into a single one, print information, examine clip properties, undo accidentally deleted clips, as well as customize the font type and size. Categories can be renamed or deleted if you change your mind, while their contents can be cleared with one click via the right-click menu. Moreover, it's possible to preview clips in a web page, send them as email attachments, enable autosave mode, convert the text case (lowercase, uppercase, title case), activate a dynamic reading mode with a pause option, as well as clear the Windows Clipboard, among others. ★ Features of SmallPea ClipEditor ?
